County: Haskell Highway: US380, etc. Control: 6457-21-001

GENERAL NOTES

Item 2 Instructions to Bidders

Contractor questions will be accepted through email, phone, and in person by the below individuals:

Questions may be submitted via the Letting Pre-Bid Q&A web page. This webpage can be accessed from the Notice to Contractors dashboard located at the following Address: https://tableau.txdot.gov/views/ProjectInformationDashboard/NoticetoContractors

All contractor questions will be reviewed by the Engineer. All questions and any corresponding responses that are generated will be posted through the same Letting Pre-Bid Q&A web page.

The Letting Pre-Bid Q&A web page for each project can be accessed by using the dashboard to navigate to the project you are interested in by scrolling or filtering the dashboard using the controls on the left. Hover over the blue hyperlink for the project you want to view the Q&A for and click on the link in the window that pops up.

Item 4 – Scope of Work

If agreed upon in writing by both parties to the contract, the contract may be extended for an additional period of time not to exceed the original contract time period. The extended contract will be for the original bid quantities, terms, and conditions, plus any applicable change orders.

This is a <u>non-site-specific contract</u>, locations of tracts and work to be performed will be identified in individual work orders on an as need basis. Site information shown in the plans is for contractor's information only.

Item 7 Legal Relations and Responsibilities

No significant traffic generator events identified.

Cost for repair or replacement of appurtenances damaged by the contractor will be deducted from the contractor's monthly estimate.

Item 8 Prosecution and Progress

Each contract awarded by the Department stands on its own and as such, is separate from other contracts. A contractor awarded multiple contracts, must be capable and sufficiently staffed to concurrently process any or all contracts at the same time.

Liquidated Damages as stated in Special Provision, "Schedule of Liquidated Damages", will be assessed if a cycle is not completed within the specified number of working days.

Item 9 Measurement and Payment

This is a <u>callout contract</u>, plans quantity measurement requirements are not applicable.

Item 502 Barricades, Signs, and Traffic Handling

Additional signs, barricades and traffic handling may be necessary to complete the work shown herein and will be provided by the contractor as required and will be considered subsidiary to the bid items.

pg. A

Project Number: RMC 6457-21-001 County: Haskell

Highway: US380, etc. Control: 6457-21-001

GENERAL NOTES

Traffic control shall be in compliance with the "Texas Manual on Uniform Traffic Control Devices", the TCP standards included in the plans, and the "Compliant Work Zone Traffic Control Device" list.

Work will not be allowed on both sides of the roadbed at the same time.

All workers are required to wear appropriate OSHA approved personal protective equipment, (fluorescent safety vest, hard hats, safety toed shoes, etc.), at all times while outside of vehicles on the project.

No mowing operations or moving of mowing equipment will be allowed before sunrise or after sunset. Trimming operations, for the day, must be completed at least 30 minutes before sunset.

All vehicles, including work trucks and tractors, must be equipped with highly visible omnidirectional amber flashing warning lights.

Item 730 Roadside Mowing

The Engineer will determine the sequence of tracts to be mowed.

In area where cable median barrier exist, narrow strips of vegetation will be mowed with a rigid frame mower or as approved in writing by the Engineer.

Slopes will be mowed with no damage to the established vegetation.

Other construction and/or maintenance contracts may be underway on roadsides to be mowed in this contract. Mowing will not be required in these areas when approved by the Engineer.

For each cycle required, the Engineer will send the contractor a work order containing the following information:

- Tract numbers in priority order and total number of acres to be mowed and litter removal.
- Working days allowed to complete the cycle
- Date when time charges for the cycle will begin
- Inspectors contact information

Working days allowed to complete a cycle will be determined by dividing the total number of acres by the production rate of 125 acres/working day, a fraction of a day will be rounded up to the nearest whole number. An additional 2 working days will be added to the total for each cycle when litter removal is required. If the total number of working days is not used during the completion of the work required within one cycle, the working days will not be carried forward to any cycle periods.

The Contractor is required to contact the inspector prior to beginning work each day.

Always mow the entire width of medians and outer separations (areas between main lanes, ramps, and frontage road), before moving to another tract.

GENERAL NOTES

Perform hand trimming in areas where mowers are unable to access and hand trim 5 ft. behind guardrail or as directed by the Engineer.

Definitions:

Full Width Mow – Mow entire width of right of way. Strip Mow – Mow 15 feet from edge of pavement or unpaved shoulder.

Strip mow as shown below at intersections and curves for sight distance. Transition Length (Tr) will be no less than 200'.

MOWING FOR SIGHT DISTANCE WITH TRANSITION FROM INTERSECTION BACK TO STRIP MOWING

Project Number: RMC 6457-21-001 County: Haskell

Highway: US380, etc. Control: 6457-21-001

GENERAL NOTES

Item 734 Litter Removal

Litter removal will be performed no more than 2 working days prior to the mowing cycle.

Pick up any litter remaining after mowing operation.

Only one cycle of litter removal will be paid per mowing cycle.

It is the intent of this item that TxDOT's right-of-way be mowed and litter-free after the contractor's mowing operation.

GENERAL NOTES

TRAFFIC CONTROL PLAN FOR WORK OFF OF THE PAVED SURFACE.

GENERAL NOTES FOR WORK ZONE SIGNS

- 1. Contractor shall install and maintain signs in a straight and plumb condition and/or as directed by the Engineer.
- Wooden sign posts shall be painted white.
- Barricades shall NOT be used as sign supports.
- Nails shall NOT be used to attach signs to any support.
- All signs shall be installed in accordance with the plans or as directed by the Engineer. Signs shall be used to regulate, warn, and quide the traveling public safely through the work zone.
- The Contractor may furnish either the sign design shown in the plans or in the "Standard Highway Sign Designs for Texas" (SHSD). The Engineer/Inspector may require the Contractor to furnish other work zone signs that are shown in the TMUTCD but may have been omitted from the plans. Any variation in the plans shall be documented by written agreement between the Engineer and the Contractor's Responsible Person. All changes must be documented in writing before being implemented. This can include documenting the changes in the Inspector's TxDOT diary and having both the Inspector and Contractor initial and date the agreed upon changes. The additional signs requested by the Engineer/Inspector shall not be subsidiary.
- The Contractor shall furnish sign supports listed in the "Compliant Work Zone Traffic Control Device List" (CWZTCD). The Contractor shall install the sign support in accordance with the manufacturer's recommendations. If there is a question regarding installation procedures, the Contractor shall furnish the Engineer a copy of the manufacturer's installation recommendations so that the Engineer can verify the correct procedures are being followed.
- The Contractor is responsible for sign installations and replacing signs with damaged or cracked substrates and/or damaged or marred reflective sheeting as directed by the Engineer/Inspector.
- Identification markings may be shown only on the back of the sign substrate. The maximum height of letters and/or company logos used for identification shall be 1".
- 10. The Contractor shall replace damaged wood posts. New or damaged wood sign posts shall not be spliced.

Duration of Work (as defined by the "Texas Manual on Uniform Traffic Control Devices" Part VI)

- 1. The Contractor is responsible for ensuring the sign support and substrate meets crashworthiness. For mowing
- operation all signs and supportS are Short-term Duration for daytime work. 2. The Contractor shall furnish the sign sizes shown on this sheet or as directed by the Engineer.

SIGN SUBSTRATES

- The Contractor shall ensure that the sign substrate is allowed for the type of sign support that is being used. The CWZTCD lists each substrate that can be used on the different types and models of sign supports.
- "Mesh" type materials are NOT an approved sign substrate.
- All wooden individual sign panels fabricated from 2 or more pieces shall have one or more plywood cleat, 1/2" thick by 6" wide, fastened to the back of the sign and extending fully across the sign. The cleat shall be attached to the back of the sign using wood screws that do not penetrate the face of the sign panel. The screws shall be placed on both sides of the splice and spaced at 6" centers. The Engineer may approve other methods of splicing the sign faces.

REFLECTIVE SHEETING

- Reflectorized signs shall be constructed of sheeting meeting the color and retro-reflectivity requirements of DMS-8300 or DMS-8310. The DMS specifications can be accessed from the following web address:
 - http://manuals.dot.state.tx.us:80/dynaweb/colmates/@Generic__CollectionView.cs=default:ts=default
- White sheeting, meeting the requirements of DMS-8300 Type C (High Specific Intensity), shall be used for signs with white background and channelizing devices.
- Orange sheeting, meeting the requirements of DMS-8300 Type E (Fluorescent Prismatic), shall be used for signs with orange backgrounds. SIGN LETTERS
- 1. All sign letters and numbers shall be clear, and open rounded type uppercase alphabet letters as approved by the Federal Highway Administration (FHWA) and as published in the "Standard Highway Sign Design for Texas" manual. Signs, letters and numbers shall be of first class workmanship in accordance with Department Standards and Specifications.

REMOVING OR COVERING

- Signs should be removed or completely covered when not mowing.
- 2. Duct tape or other adhesive material shall NOT be affixed to a sign face.
- 3. Signs and supports shall be removed by the end of the day.

- Where sign supports require the use of weights to keep from turning over, the use of sandbags with dry cohesionless sand is recommended.
- 2. The sandbags will be tied shut to keep the sand from spilling and to maintain a constant weight.
- Rock, concrete, iron, steel or other solid objects will not be permitted for use as sign support weights.
 - Sandbags should weigh a minimum of 35 lbs and a maximum of 50 lbs.
- Sandbags shall be made of a durable material that tears upon vehicular impact.
- Rubber (such as tire inner tubes) shall NOT be used for sandbags.
- Rubber ballasts (such as those used with cones or edgeline channelizers) shall NOT be used as sign support weights.
- Sandbags shall only be placed along or laid over the base supports of the traffic control device and shall not be suspended above ground level or hung with rope, wire, chains or other fasteners. Sandbags shall be placed along the length of the skids to weigh down the sign supports.
- Sandbags shall NOT be placed under the skid and shall not be used to level sign supports placed on slopes.

CONTRACTOR REQUIREMENTS FOR MAINTAINING PERMANENT SIGNS WITHIN THE PROJECT LIMITS

Any sign, sign support or traffic control device that is struck or damaged by the Contractor or his/her construction equipment shall be replaced or repaired as soon as possible by the Contractor at the Contractor's expense.

Only pre-qualified products shall be used. A copy of the "Compliant Work Zone Traffic Control Devices List" (CWZTCD) describes pre-auglified products and their sources and may be obtained by contacting:

Standards Engineer Traffic Operations Division - TE Texas Department of Transportation 125 East 11th Street Austin, Texas 78701-2483 Phone (512) 416-3120 Fox (512) 416-3299
